

Land Managers Luncheon: Application of Herbicides for Vegetation Management

Date:

Friday, 23 August, 2013

Time:

9:00 AM — 2:00 PM

Lunch @ 12:00

Location:

The Barn at
Tall Timbers Research Station

Lunch is included!

Cost:

Tall Timbers Member — Free
Others (non-members) — \$25

Seats are limited
RSVP...

You are cordially invited to attend the Third Tall Timbers Land Manager's Luncheon! These luncheons are designed for the land manager in mind but may also provide benefit to landowners, biologists, and other natural resource enthusiasts.

Our focal topic for this luncheon is understanding the use and application of herbicides for vegetation management. We are pleased to have guest speaker, Mark Atwater with Weed Control Unlimited, Inc., lead our discussion on herbicide applications and their integration into wildlife habitat management. Come join us for lunch to learn more — we hope to see you there!!

Overview of the Luncheon

Despite our best habitat management efforts sometimes herbicides become a valid option for managing vegetation. During this luncheon we will discuss practical application of herbicides, biological controls, and machinery to meet vegetation management objectives. Specific topics covered include:

- Differences in herbicide types and treatments;
- Types and uses of various application techniques;
- Combatting unwanted noxious weeds with chemical and mechanical management;
- Important considerations when using herbicides for vegetation management;
- Objective-based vegetation management;
- Best practices for groundcover restoration start-finish; and a
- Short field tour following lunch.
